DETAILED ACTION

1. This communication is in response to Applicant's application of December 04, 2001, which claims the benefit of 60/251,077 of December 04, 2000. Claims 1-49 are pending in the application and are presented to be examined upon their merits.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. **Claims 1-49 are rejected under 35 U.S.C. 102(b) as being anticipated by Lebda et al (US Patent 6,385,594, hereinafter Lebda).** In reference to claims 1, 13, 25-26, 35 and 47-49, Lebda discloses a system, method and apparatus system for syndicating financial obligations, comprising: a process controller that receives information regarding a financial obligation of a first entity that has not been approved by the first entity (col. 2, lines 65-67; col. 3-4; col. 5, lines 21-42; col. 6, lines 51-67). Lebda discloses a syndication module that automatically sends information regarding the financial obligation to prompt a decision from a second entity different from the first entity about assuming at least a portion of the financial obligation (col. 3-4).

Art Unit: 3693

4. In reference to claims 2-4, 14-16, 27-29 and 36-38, discloses the system wherein the syndication module analyzes at least part of the information regarding the financial obligation to select the second entity; wherein the financial obligation is a loan; and wherein the financial obligation includes a loan that has or has not been approved by the first entity (col. 2, lines 65-67; col. 3-4; col. 5, lines 21-42; col. 6, lines 51-67).

5. In reference to claims 5-7, 17-19, 30-34 and 39-43 discloses the system further comprising a process module adapted to determine whether the first entity will accept the financial obligation, and wherein the financial obligation includes a loan, the process module determining that the loan is approved by the first entity after a decision is made for the second entity to assume at least a portion of the financial obligation; further comprising a process module adapted to determine whether the first entity will accept the financial obligation, and wherein the financial obligation is a loan and the first entity is a lender, the process module determining that the first lender will approve the loan after a decision is made for the second entity to assume a risk of at least a portion of the loan; further comprising a first lender process module that processes the information regarding the financial obligation received by the process controller and determines whether the first entity will accept financial obligation and a second lender process module that receives the information from the syndication module and determines if the second entity will accept at least a portion of the financial obligation (col. 2, lines 65-67; col. 3-4; col. 5, lines 21-42; col. 6, lines 51-67).

6. In reference to claims 8-9, 20-22 and 44, discloses the system wherein the first lender process module determines that the first entity will not accept the financial obligation; wherein the first lender process module determines that the first entity will accept only a portion of the financial obligation, and the second lender process module determines that the second entity will accept another portion of the financial obligation; and wherein the process controller receives information regarding a plurality of financial obligations of the first entity, and the syndication module sends information regarding the plurality of financial obligations so that decisions are made for at least one other entity whether to accept a portion of the plurality of financial obligations (col. 2, lines 65-67; col. 3-4; col. 5, lines 21-42; col. 6, lines 51-67).

7. In reference to claims 11-12, 24-25 and 45-46, discloses the system wherein the syndication module selects the second entity based on one of a credit risk posed by the financial obligation, and a geographic parameter related to the financial obligation; and wherein the syndication module is adapted to auction portions of a financial obligation or a portfolio of financial obligations to a plurality of entities (col. 2, lines 65-67; col. 3-4; col. 5, lines 21-42; col. 6, lines 51-67).
